ABSTRACT

This videocassette introduces SPEEDE/ExPRESS, a system for the electronic transfer of student records. The electronic transfer of student transcripts and other records has numerous benefits for students, in terms of timely transfer, and for administrators who will find it easier and quicker to transfer records rapidly through electronic means, whether electronic mail or by disc or magnetic tape. SPEEDE/ExPRESS provides a standardized format and codes for describing data and a directory of participating school districts, agencies, and institutions with information about how to contact them and transmit information. Electronic transfer has the potential for improving education through expediting records transfer and freeing personnel to concentrate on other tasks. (SLD)
